Essential Standards Observation Assessment Chart

Determine the Essential Grade Level Standards and add a title or Standard Number to each column. Use this chart as a daily, weekly or monthly Assessment Check System. Mark the date, +, X or another marking system when each student is observed meeting the specific Standard. Variations: Student Learning Teams can utilize this chart to assess team members, and individual students can utilize it as a self-assessment system. If you notice a pattern of non-mastery horizontally = student concern (work with the student individually). Non-mastery vertically = instruction concern (review the concept with the whole class).
